About Us

Heritage Lighting fully recognises that quality and ambience are essential for the traditional and heritage sectors. Working closely with the National Trust and Historic Houses Association since 2010, Heritage Lighting has developed a unique and patented Conservation Standard range of lamps.

This extensive product range offers all the cost-saving and environmentally friendly benefits of LED lighting without compromising the conservation requirements of historic artworks, fabrics, tapestries and stonework.

As the leading provider of speciality LED lighting solutions, Heritage Lighting's extensive Conservation Standard lighting range offers the complete solution essential for the traditional and heritage sectors.

Why choose Conservation Standard LED lamps from Heritage Lighting?

Our range of LED lamps has been developed to meet the demanding conservation standards whilst retaining the ambience and aesthetics of a traditional light bulb.

Additionally, our unique Conservation Standard LED lamps have been designed to:

- Reduce energy consumption by up to 91.7%
- Reduce routine maintenance costs by up to 35 times
- Illuminate instantly when switched on
- Reduce damaging heat output by up to 72.1%
- Hugely reduce your carbon footprint
- Remove the harmful effects of UV light

“With over 300 candle bulbs required in Castle Howard, we had to be happy with the aesthetics of the bulbs, the colour temperature, the lack of UV, the low running temperatures, and naturally the energy savings which have been immense. Embracing new technology in an 18th century building is always a challenge, and on this occasion the results speak for themselves.”

The Hon Simon Howard,
Castle Howard

Heritage Lighting are trusted suppliers to:

- National Trust
- Historic Houses Association
- English Heritage
- Independent Historic Houses and Estates
- Historic Royal Palaces
- The Treasure Houses of England
- Historic Scotland
- Local Authorities
- National Trust for Scotland
- Church of England

Conservation Standard Range Development

This range of speciality Conservation Standard Lamps was developed with both the National Trust and Historic Houses Association over a period of 24 months. A set of key criteria was set, achieved and after extensive testing, field trials and refinement were fully approved by both organisations for roll out to their member locations.

“We worked with Heritage Lighting to develop this new range of candle bulbs so that we would meet the very high standards that we have for our museum and conservation areas. We are now in the process of rolling them out nationally. We found that they were a very quick & easy way to reduce our energy usage and meet our environmental targets. This range was featured in the Ashden International Environmental Presentations where we won the Gold Medal 2012”

Paul Southall - Environmental Advisor, National Trust

Heritage Lighting LED Product Range

We have a range of products that are suitable for virtually any type of environment. From building exteriors to lighting works of art, we have the perfect LED solution.

We can colour match light sources to ensure that any exterior or interior features, artefacts or works of art are illuminated as they were originally intended to be seen.
